## WORK HISTORY

- Apprentice at Project Codex | Feb-Nov 2021
- Designs and develops projects from stretch .
- Create responsive applications
- Performs testing of app.
- Plan using kanbanFlow

## Selected Projects

### Matching Days

Code: <https://github.com/mdlangamandla/Matching-Days>  
Live: <https://mdlangamandla.github.io/Matching-Days/>

- Created a Matching Days application where you select a date of your choice to find out which day of the week it falls, The first selected date turns red and the second selected date turns orange. It turns green when the selected days fall on the same days.

### Greeting Application

Code: <https://github.com/mdlangamandla/greet-express-app>  
Live: <https://greeting-application.herokuapp.com/>

- Designed and created a Greeting application that greets in 3 different languages, counts the number of greeted names, shows the names greeted and how many times a name has been greeted. It also allows the user to delete the greeted names.

### Settings Bills

Code: <https://github.com/mdlangamandla/settings-bill-expressjs>  
Live: <https://settings-bill-nodejs.herokuapp.com/>

- Created an app that lets a user bill client using either call or SMS, The app has settings that allow the user to set call costs and SMS costs.

## ACADEMIC HISTORY

### Cape Peninsula University of Technology

ND: Civil Engineering |2013
